

Start The Process

Chinoiserie by Tempaper is a special order program. Designs are scalable to size and printed on a self-adhesive, removable, fabric wallpaper that is type A rated for flame spread and smoke. In order to ensure a seamless process please follow the steps below:

1

Select your pattern and color. We recommend ordering a sample prior to starting the custom process to ensure wall preparedness for a full wall application. Surface should be smooth, primed and painted using an eggshell, satin or semi-gloss finish.

2

Submit detailed elevations of your space to custom@tempaperdesigns.com. If you are covering more than one wall, please number them. Be sure to include the following with your elevations:

Length and height of each wall (between the molding)

Length and width of each door and/or window

Distance of each door/window from the corners of the room, floor and ceiling

A photo of the space with the walls numbered to match the above measurements

The print and colorway you have selected

Our custom department will review your elevations and provide an estimate.

Non-metallic designs are \$12/square foot and metallic designs are \$15/square foot.

A \$35 credit will appear on your final order if a sample is purchased prior to the start of your project.

3

To start your order, a 50% non-refundable deposit is required. Once the deposit is received, Tempaper will provide a rendering of your project for approval. Please allow 2 business days for this process.

Review your rendering carefully. Once Tempaper receives your approval, no further changes can be made. At this time, your order must be paid in full. Once payment is accepted, your Chinoiserie order will be printed within 7-10 business days.

When your order arrives, it will be in numbered panels for application.
